

# PrismHR Hiring Staffing Overview

## What is the Staffing/Multisite Version?

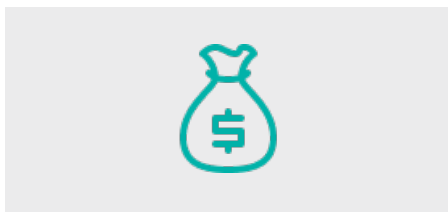

PrismHR Hiring has a part of our applicant tracking system (ATS) that we refer to as a **Staffing/Multisite Version**. In a nutshell, this version of our software allows users to manage all recruiting efforts across multiple clients/entities/locations/subsidiaries from one single account. Our staffing features include site billing, applicant pooling, and our centralized careers page.

## Benefits of the Staffing/Multisite Version

- Manage multiple clients from a single account
- Create customized client-branded job pages
- Smart permissions let your clients see only the activity related to their searches
- Real-time activity brings transparency to recruiter productivity
- Job requisition workflow automatically creates a new offline job and notifies the recruiting team
- Client management tools unify all activity for a client in a single screen
- Flexible pricing allows you to pay for clients that are actively hiring

Clients & Sites		
<small>Multiple clients &amp; sites allows you to manage multiple Career Pages from a single account. Click on the magnifying glass to see jobs, add notes, files and tags, and edit details. Note that global settings made on the Account Details page, like requiring address on the application form, apply to all Clients &amp; Sites.</small>
