Welcome [Company Name!]

We're excited to onboard you with our new Rippling ATS account! As we wrap up our development between two companies and software platforms, we will be here along the way to ensure you kickstart your hiring process and workflows to hire the best talent!

During the short window where integration is underway, you'll have two logins, one for your Rippling platform and another for your Rippling ATS. We'll be sure to assist with your career page connection and account set up during your implementation phase.

You've selected the **[premium or small business]** guided setup and we'll charge your card on file **[XXX.XX]**. This implementation program also provides you with support during the migration phase in Q3. Please add your credit card via this secure link:

Each month, our partners at Rippling will supply us with your updated employee count and we'll charge the same card your PEPM fee for ATS services. You can anticipate this charge to be made by the 5th business day each month.

Once the development work is finalized and your account is successfully migrated to a connected account, you'll access your account via Single Sign-On within Rippling. At this point in time, your billing will simplify with one single invoice for all services.

We appreciate your patience as we combine two fantastic technologies to provide you with a unique, deeply integrated recruiting and onboarding solution. We can't wait to assist you in modernizing your hiring processes and finding skilled, new team members to help your organization succeed!

We look forward to working with you,

HiringThing Implementation Team
